-
- nut.s industrial**
-
- The sectorial software solution
- for the food industry

nut.s industrial

has been especially designed for the requirements of food industry.

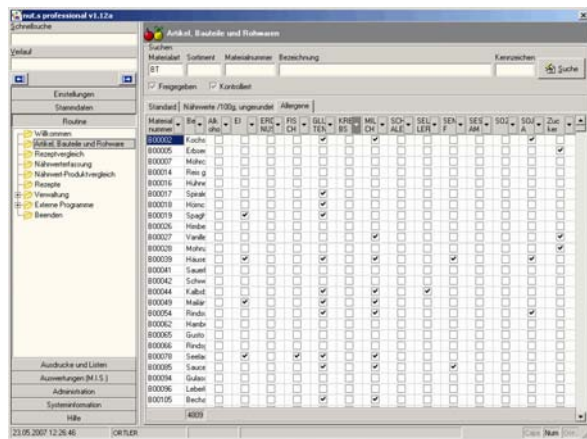

Functions:

- Nutrient calculation of your own products
- Automatic rounding of values according to duty-of-declaration specifications
- Allows working with item numbers of products used and with actual package sizes
- Entry of nutrients of your own suppliers
- Allergen labeling including producer verification

Your products:

From pineapple yoghurt to gravy, croissant and lemon-juice
... our software can handle everything which can be eaten or drunk!

Your task:

- Package compliant nutrient calculation (BIG 4, BIG 8)
- Allergen labeling
- Recipe development and optimization

Our solution:

nut.s industrial is the software of choice for the food industry!

Quality from scratch

nut.s industrial is available in three different price models, graduated according to the extent of data volumes.

From a Start-up package to the Big Business solution we offer price models for every budget.

All nut.s programs can also be rented. For more information please refer to: www.nutritional-software.at

Professional advice

Our software and nutritional experts will be pleased to meet you personally to discuss your individual requirements regarding a software.
